

M. Durga Praneeth

Computer Science Engineer (IOT)

Vijayawada, India

+91 7793933505 | muvalapraneeth@gmail.com | [linkedin](#) | [Github](#)

CAREER OBJECTIVE

Motivated Computer Science Engineering student with hands-on experience in full-stack web development, software development, and problem-solving through academic projects and internships. Skilled in Python, JavaScript, MERN stack, SQL, and front-end technologies with knowledge of software development life cycle, debugging, testing, and application maintenance. Seeking an opportunity to contribute technical and analytical skills to a dynamic software engineering team.

EDUCATION

Bachelor of Computer Science Engineering with Specialization IOT 2022 - 2026
PSCMR College of Engineering and Technology Vijayawada , India
Percentage - 73.73%

Intermediate in Mathematics, Physics, and Chemistry (MPC) 2020 - 2022
KBN College Vijayawada , India
Percentage - 79.9%

Secondary School Certificate (SSC) 2019 – 2020
MSR English Medium High School Vijayawada , India
Percentage - 94.67%

TECHNICAL SKILLS

Languages: Python, JavaScript, C

Web Technologies: HTML, CSS

Database: MongoDB, SQL

Tools: GitHub, Firebase, Streamlit

IoT: Arduino, Raspberry Pi, ESP32

Languages

English , Telugu

PROJECTS

Password Strength Checker 24th May 2024 - 24th August 2024

- Developed a password validation application using Python to analyze password strength and provide real-time feedback.
- Implemented secure validation techniques to classify passwords as weak, medium, or strong.
- Improved understanding of debugging, secure coding practices, and user-focused application development.

Doctor Appointment System 13th May 2025 – 30th July 2025

- Developed a full-stack web application using MongoDB, Express.js, React.js, and Node.js for online doctor appointment booking and scheduling.
- Implemented secure user authentication and responsive user interfaces.
- Designed RESTful APIs and integrated database operations for efficient appointment management.
- Performed testing and debugging to improve application reliability and performance.

- Developed an AI-based crop disease detection system integrating IoT sensors and deep learning models.
- Built a Streamlit application for image classification, live sensor monitoring, and treatment recommendations.
- Worked on data preprocessing, model integration, and application deployment.

Internship Experience

Swecha

Vijayawada, Andhra Pradesh | June 2024 – July 2024

Worked as an intern at Swecha, where I developed an educational simulation project using HTML, CSS, and JavaScript. The project was designed to help students learn concepts more effectively by providing an interactive and easy-to-understand visualization. This experience enhanced my skills in front-end development, user-centered design, and creating digital learning tools.

Supraja Technologies

Vijayawada, Andhra Pradesh | May 2024 – August 2024

Worked as an intern at Supraja Technology, where I developed a Password Strength Checker project to evaluate the security level of user-entered passwords. The system provided real-time feedback on password strength, helping users create more secure credentials. This project improved my understanding of software development, secure coding practices, and user-focused application design.

Smart Bridge

Vijayawada , Andhra Pradesh | May 2025 – July 2025

Worked on developing and maintaining full-stack web applications under the Smart Bridge program using the MERN stack (MongoDB, Express.js, React, Node.js). Built features including secure user authentication, efficient data management, and responsive interfaces to improve usability. Gained hands-on experience in RESTful API development, database integration, and deploying end-to-end scalable applications.

BlackBucks

Vijayawada, Andhra Pradesh | December 2025 – March 2026

Completed a 16-week long-term internship as a Quantum Computing Specialist with Blackbucks Education Pvt. Ltd., where I engaged in structured training, practical assignments, and project-based learning to develop industry-relevant skills. Gained hands-on experience in quantum computing concepts, problem-solving techniques, and emerging technologies, while enhancing analytical thinking and technical proficiency. Actively participated in real-world simulations and learning activities aligned with current industry standards, strengthening both technical and professional competencies.

CERTIFICATIONS

IBM Full Stack Developer – Coursera

Problem Solving using Python – Codetantra

Industrial IoT 4.0 – NPTEL

Wadhwani Foundation – Employability Skills

ACHIEVEMENT

TCS CodeVita Season 13 – Rank 2303

Problem Solving (Basic) – HackerRank

DECLARATION

I hereby declare that the information given above is true to the best of my knowledge. I will make it my earnest Endeavour to discharge competently and carefully the duties you may be pleased to entrust me.

M. Durga Praneeth
